How to turn your smartphone into a second webcam

by Julien Bobroff, Frédéric Bouquet, Jeanne Parmentier and Valentine Duru
Numerical set up

- Download the Iriun app on your smartphone:
  - via Google Play (android) => Iriun 4K Webcam for PC and Mac
  - via Apple Store (iOS) => Iriun Webcam for PC and Mac

- Download the Iriun software on your computer; make sure to select the version that fits your operating system:
 - https://iriun.com/

Physical set up

- Use your imagination to make your smartphone stand above your writing surface! Old books, small storage rack, old legos… The possibilities are endless!

Start

- Make sure both your smartphone and your computer are connected to the same WiFi network

- Launch the Iriun app on your smartphone and the Iriun software on your computer: the Iriun window on your computer should be streaming the video captured by your smartphone

Uses

- On **Collaborate**: open the Collaborate side bar on the bottom right corner of your screen, click on "**share content**", then on "**share webcam**" and select "**Iriun Webcam**";

- On **Zoom**: you can share the video stream captured by your smartphone camera by clicking on "**shared screen**", and then selecting "**2nd webcam content**" in the "**advanced**" tab;

    Nb: if you have more than 2 webcams and the wrong one is initially displayed, just click on "switch webcam" on the upper left corner of your screen, until Iriun webcam is displayed.

- On **OBS**: you can now add your smartphone webcam as a source in your scenes => Beneath the "**sources**" window, click on "**+**" and select "**video capture device**", then select the device "**Iriun Webcam**".
